

PRIYASHA RATHORE

91- 7976008865

priyashakaran642@gmail.com

Jr. Software Engineer

Rajasthan, Jaipur

SUMMARY

Junior Software Engineer with hands-on experience in backend development using Django and Django REST Framework, specializing in building scalable APIs and integrating AI-driven solutions. Strong understanding of full software development lifecycle, with a focus on clean code, performance optimization, and seamless deployment. Passionate about leveraging AI and backend technologies to create impactful, data-driven applications.

EDUCATION

IIS UNIVERSITY

Bachelor's Degree in Computer Applications
2018 – 2021

BIRLA INSTITUTE OF TECHNOLOGY

Master's Degree in Computer Applications
2022 – 2024

PROJECTS

- Emotion Detection model using audio
- Summarization model
- Emotion Detection model using text
- Scoring model using text

EXTRA PROJECTS

- Course Recommendation System
- Food Delivery React app

PROFESSIONAL EXPERIENCE

Software engineer (Internship)

GLOBIVA | 2024 - 2025

- Developed and maintained RESTful APIs using Django and Django REST Framework, enabling seamless integration with front-end applications and third-party services.
- Collaborated with cross-functional teams to design, build, and optimize backend systems that supported scalable web applications.
- Integrated AI models into production environments, enabling intelligent features such as predictive analytics and automated decision-making.

Jr. Software Engineer (Full-time)

GLOBIVA | 2025 - Present

- Built a Summarization Model to generate concise and coherent summaries from long-form text data, improving information retrieval efficiency for internal tools and client-facing applications.
- Developed an Emotion Detection Model using natural language processing (NLP) techniques to classify emotional tone in customer interactions, enabling sentiment-aware analytics and automated feedback systems.
- Created a Scoring Model based on textual data to evaluate and rank user responses or conversations, supporting use cases such as quality assurance, lead qualification, and performance benchmarking.
- Leveraged libraries such as Hugging Face Transformers, spaCy, and NLTK for model training, fine-tuning, and inference.
